

AAP Implementation Strategy Outcomes/Outputs		
Workstream	Outputs (What we build)	Outcomes (The Business Value)
1. Foundation	<ul style="list-style-type: none">Platform Installation: AAP Controller & Private Hub deployed.Unified Git Structure: Single source of truth for code.Identity Connection: AD/LDAP integration for access.	Centralized ControlEliminates "works on my laptop" issues and secures access to automation assets.
2. Visibility	<ul style="list-style-type: none">Fact Gathering Jobs: Automated inventory scansDrift Dashboards: Visual reports of system variance.Subscription Manager: Red Hat Insights connections.	Operational AwarenessMoves from guessing to knowing. We can see exactly what we have and where it is broken.
3. Unification	<ul style="list-style-type: none">Shared Global Roles: Certified, reusable automation blocks.Unified Patching: One workflow for the whole fleet.Guardrails: Automated policy checks (linting/signing).	Proactive StabilityDrift is automatically fixed. We stop fighting fires and start managing a "Gold Standard."
4. Orchestration	<ul style="list-style-type: none">Self-Service Catalog: Push-button IT for end users.ITSM Integration: ServiceNow/Ticket connection.End-to-End Workflows: Zero-touch provisioning.	Optimized EfficiencyReduced MTTR (Mean Time To Resolution) and delivery times drop from days to minutes.
